Weekly Sales

Write the program that takes the sale for each day in a week to calculate and display the total sales for the week.

Input

7 integers, all in a single line, separated by space(s).

Output

Display the sum of all 7 numbers received from the input.

Example

Input (from keyboard)	Output (on screen)
10 20 30 40 50 60 70	280
0 0 0 100 0 0 0	100
